## **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The IDS submitted, covering 7 pages of references, has been considered & references examined to the extent they would be in an electronic search.

Applicant's explanation that the claim 4 limitation limits the essential component is persuasive, & the rrejection under #112 is withdrawn.

Claims 5, 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Thirumalachar et al 4544666.

Tannins, tannic acid relatively non-toxic (col. 3, A) to plants and animals, but not to fungi, bacteria and other microbes (col. 1, 2) are provided in non-toxic carrier (A-2, col. 4, col. 6, 7 C.) the instant glycerol, and propylene glycol, by spraying wood plants (1-4, grapes) and (C-1) impregnation of trees. The doses used are non-toxic (D-10). The compositions do not interfere with the function of protecting against microbes, they have no deleterious effects on the function of the methods of treatment of wood; thus the aadded ingredients are not outside the instant open claim language.

Claims 1-10, 12,13, 19-21, 24, 30, 36, 43, 46-48 stand rejected under 35 U.S.C. 1O3(a) as being unpatentable over Blum et al 6207290 and Kuwazuru et al 565432 in view of Thirumalachar et al and Watt 5397385 and Bessett et al WO 98/54971

Applicant's arguments filed 12/12/05 have been fully considered but they are not persuasive. Applicant's arguments in essence are that the prior art utilizes compositions not limited to the instantly claimed essential ingredients. Examiner finds

the prior art addresses the instant methods of treatment, & one in the art would know to apply the instant non critical components & concentrations thereof in order to protect woods from a number of adverse conditions.
